

QUIZ - Energy Star and Modular Homes
9-10-08

Thank you for participating in Wednesday's NE HERS Alliance conference call.

If you or your HERS Provider is a member of the NE HERS Alliance and you are a certified HERS rater, you can earn one continuing education credit (CEU) if you answer 5 of the quiz questions and email back to me within a month of the original call.

Feel free to forward the quiz to all certified raters from your company who listened to (or plan to download and listen to) the conference call. To earn the credit they each must respond in a separate email to me.

REMINDER ON CEUS: your accredited provider must keep a record of the CEUs that their certified raters earn, so please inform your quality assurance designee whenever you submit the quiz for an NEHERS call. My records may serve as a backup, but are not guaranteed.

Let me know if you have any questions.
Peggy MacLeod, Communications Coordinator

PLEASE ANSWER the QUESTIONS BELOW AND RETURN TO: energyhome@yahoo.com

NAME: PROVIDER ORGANIZATION:

ARE YOU A CERTIFIED RATER? yes no (no CEU for non-certified raters)

1. Does the "Energy Star Qualified Homes Thermal Bypass Checklist" differ from the "Energy Star Qualified Modular Home Inspection Checklist", and if so, in what way(s).

2. During the construction process, how many people must complete and sign the modular inspection checklist for each home? (Check all that apply)

- Factory Owner
- Modular Certifier
- Architect
- Representative from EPA's modular division
- Home Energy Rater
- Rater provider quality assurance designee
- Builder employee

3. The modular in-plant certifier is not overseen by a rater. True False

4. Name two procedure differences and their intended benefits between the new Energy Star modular certification protocol and certifying a modular home prior to the launch of the protocol.

5. Modular homes must be verified by a rater in the field, but how is that verification process different than homes completely site built?
